

IBM Lotus Notes and IBM Lotus Domino 8.5 software

Think social. Do business.

IBM Lotus Notes® and IBM Lotus® Domino® 8.5 software puts the power of social business in your hands. The comprehensive solution delivers rich social capabilities within existing business processes to accelerate operations and enhance productivity. Users can make better-informed decisions, faster, with quicker access to the people and information they need. And they can do it from anywhere, at any time.

Built to run your business

Your key business activities—marketing, customer relationship management, product development, human resources and more—are empowered with solutions that can help deliver results that exceed expectations.

- Seize almost any business opportunity by tapping into the thousands of available business solutions built on Lotus Notes and Domino software, available from IBM Business Partners and open source communities
- Streamline and accelerate business processes that have strict approval and compliance requirements through an integrated workflow engine that can be used by any application

Create compelling social applications—fast

Social applications blend enterprise data and social content, helping a company quickly capitalize on emerging business opportunities.

- Realize fast time-to-deployment with applications built on a document-driven, NoSQL architecture
- Deliver applications right where end users need them—mobile devices, web browsers and rich desktop clients—with XPages, based on web and Java technologies
- Create more powerful enterprise systems by socializing Lotus Notes and Domino content with lightweight Representational State Transfer (REST) interfaces

Bring together people and ideas, from anywhere, at any time

Innovation can flourish and productivity can soar, as business end users shift from searching to quickly discovering skills and information they need to make better decisions.

- Connect end users through email, calendars, presence awareness, instant messaging, status updates, file sharing, widgets and live text delivered in a single offering—available right at the point where users are working
- Empower mobile users with email and applications delivered to their preferred mobile devices, while adhering to corporate security policies and protecting business data
- Maintain the productivity of end users, even when they are not connected, enabling data to be synced when connectivity is restored

Spend less and do more

IT staff are freed to focus on your organization's strategic initiatives, helping achieve a lower total cost of ownership through minimized administrative requirements.

- Automate monitoring, policy deployments and client installations
- Minimize expensive server and storage needs with advanced compression and storage management capabilities
- Ease the burdens of infrastructure management through seamless integration with IBM SmartCloud™ Notes™
- Allow flexible on-premises deployment strategies with support across diverse platforms
- Enable deployment of highly scalable and available applications with clustering and failover technologies
- Safeguard business data with digital certificates, data encryption and a virus-resistant architecture
- Minimize disruptions and protect investments during release upgrades
